WHERE TECHNOLOGY MEETS SCIENCE

Who we Are

Kosten aike roughly translates to “the place of the winds” in the traditional Tehuelche language of Patagonia. At Kosten, we draw inspiration from the relentless power and the sustainable energy the winds bestow upon the southern lands.

We are working to bring a new wind to digital healthcare landscape to elevate patient care on a global scale.

Kosten meets your team where you are in the digital journey, developing technology into sustainable solutions that empower sweeping success. **We work where health meets technology.**

Kōsten

We can help you

Our services are individually designed to meet your needs. We join forces with healthcare providers, pharmaceutical entities, hospitals, regulators, payors, and patients to deliver digital solutions to enhance the healthcare experience and help improve the well-being of humanity.

Transform your organization to make it more agile and innovative through technology

Create digital products to evolve your organization

Optimize your business processes reducing costs and increasing efficiencies

Empower better decision-making by harnessing the power of data and Artificial Intelligence (AI)

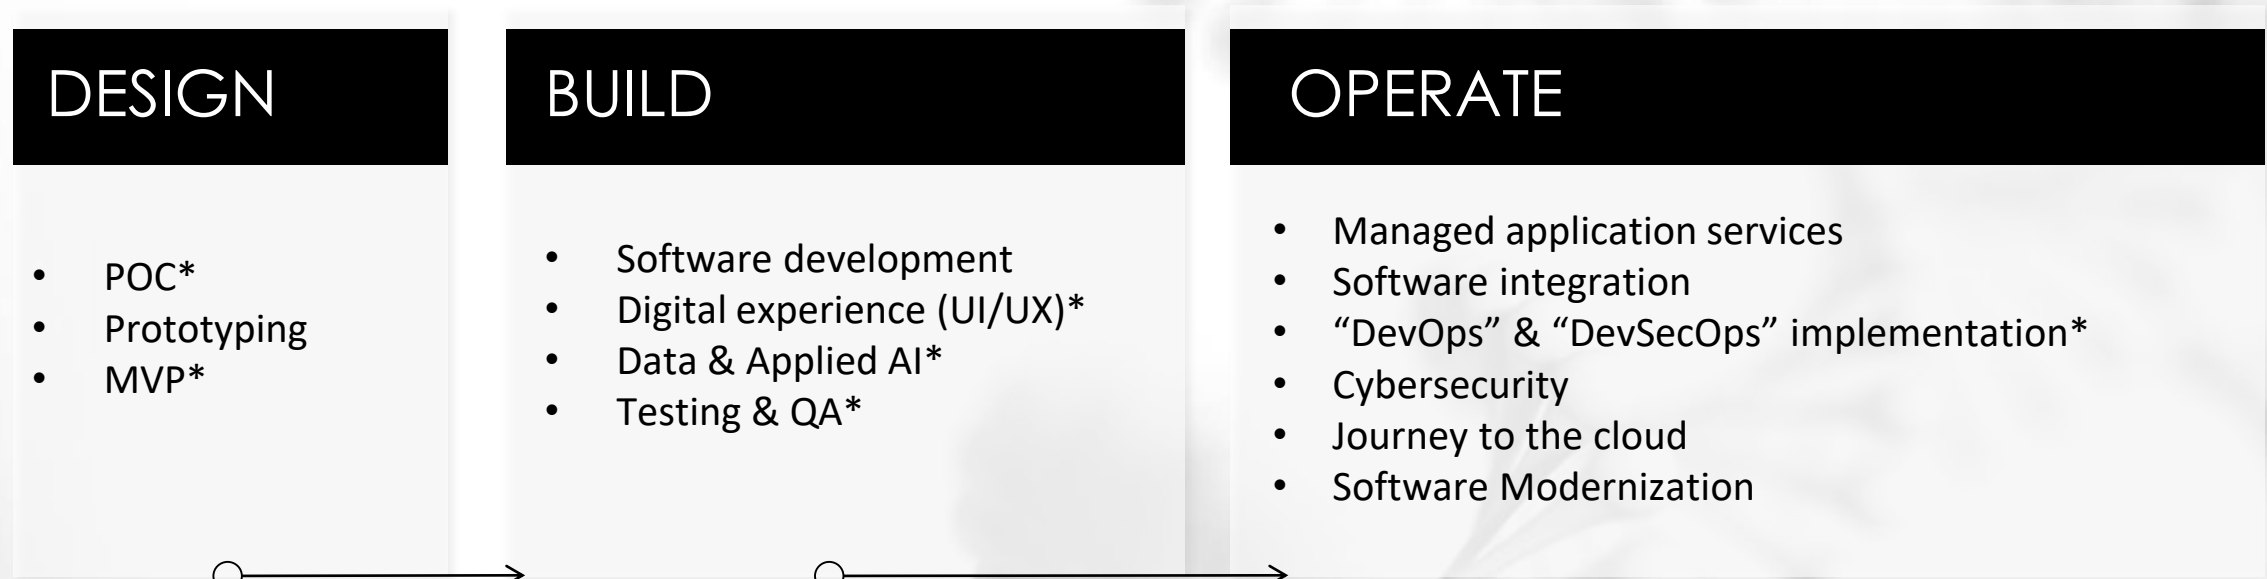

Simplify and secure your IT operations so that your team can focus on the business

Assure global compliance throughout your processes

Kosten Solutions

We support you through your digital journey with solutions that are secure, compliant and help expand your bottom line.

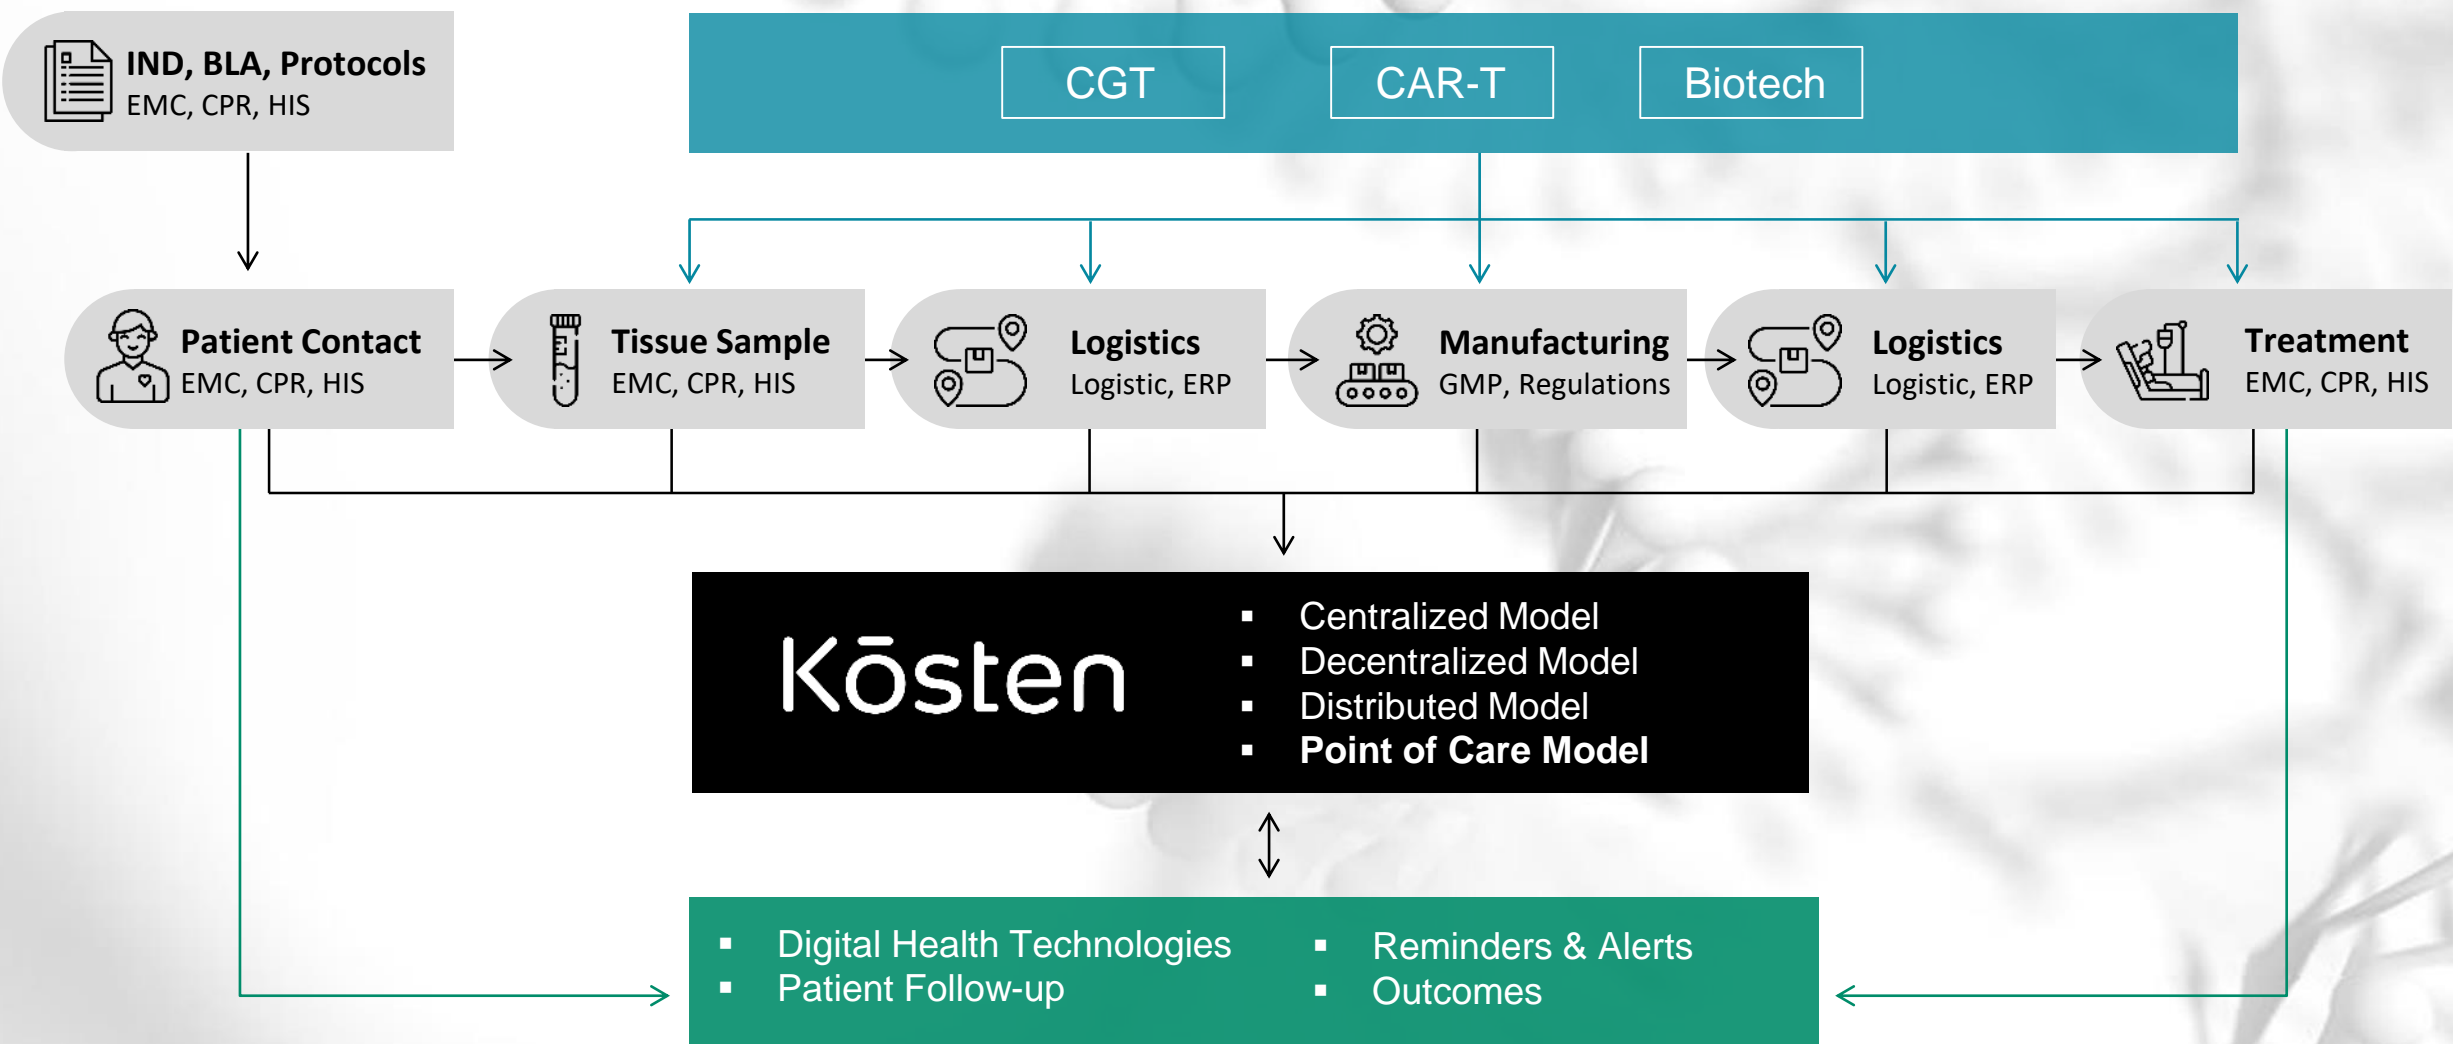

*

POC: Proof of concept – technical validation of the software solution
MVP: Minimum viable product – end user validation of the software solution
UI/UX: User interface & user experience
AI: Artificial intelligence

QA: Quality assurance
DevOps: combination of development & Operations
DevSecOps: combination of development, Security & Operations

End to End and Patient-Centric Solutions

Case Studies

World Health Organisation - WHO

WHO needed a tool that would allow them to gather information from all their branches to track key achievements and progress. This data was used to report on work impact worldwide.

A solution was built that enabled the collection of data from highly diverse formats, allowing it to be stored, transformed, and displayed uniformly for subsequent evaluation.

The perceived value was increased as it streamlined information and made it easily accessible to key stakeholders.

Hôpitaux Universitaires de Genève (HUG) - Switzerland

HUG needed a custom mobile and web messaging application to allow the team of healthcare professionals to connect directly, or in communities, groups, and forums for secure academic discussions.

A hybrid solution was implemented to manage content and community administration, along with a customized communications platform to meet the client's specific needs.

User satisfaction increased and the information exchange grew exponentially.

Thank you for your attention

We look forward to meeting you
where you are in your global
journey and carrying your team
ahead on the winds of Kosten.
